

## INTEGRIFUSE Specs:

- Supply Voltage: 97 to 150 VAC
- Supply Frequency: 47Hz to 70Hz
- Max Supply Current: 42 Amps at 80 Amps Output
- Output Voltage: 8 VAC to 48 VAC
- Operating Temp Range: 0 F to 120 F
- Fusion Info Storage: 6,000 Fusions

# INTEGRIFUSE Electrofusion Processors

**The IntegriFuse Processor**, weighing only 48 lbs, is a reliable, easy to use, rugged tool designed to withstand conditions found at construction sites in North America.

**The IntegriFuse Processor** will fuse ALL bar coded fittings up to 63" IPS, and includes pin adapters to fit all US manufactures' fittings.

**The IntegriFuse Processor** can be operated in either the Barcode or Manual modes and requires minimal operator training

**\*The IntegriFuse processor must be used for all Tega fittings larger than 24" IPS in diameter, and all fittings rated above 40 Volts**
